

Antibodies for Flow Cytometry

Prolmmune offers a range of high quality antibodies relevant to cellular immunology. These antibodies have been tested for superior performance in flow cytometry in conjunction with Pro5[®] MHC Class I Pentamers.

Antibodies in our range are available with FITC, R-PE and PE Cy5 fluorescent labels and in pack sizes of 50 and 150 tests for convenience of use alongside our Pro5[®] Pentamers

Example staining data for each antibody is available online at www.proimmune.com.
